

## **User Manual - Australian Flood Studies Database Search**

The following criteria are available to search the Australian Flood Studies Database:

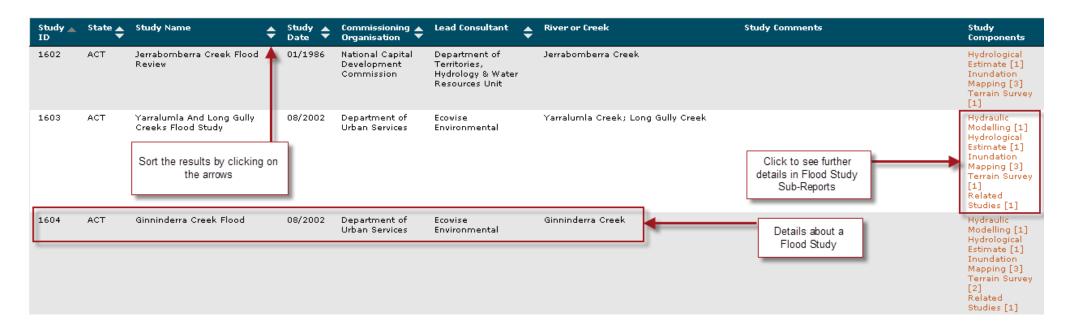

- Town name
- River or creek
- State or Territory
- Study Completion Date Range
- By a specific area on the map

You can search using any combination of these criteria.

The system will display the search results as a brief description of flood studies found:

## Search Results

Click on the right hand links in a flood study to view the sub-reports about that specific study. An example Flood Inundation Mapping Sub-Report is shown below:

## Flood Inundation Mapping
